† Prices are per share not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF FEBRUARY.

The progress in financial legislation at Washington and the successes achieved by British arms in South Africa were the distinguishing events during February. For the first time since the Anglo-Boer war broke out, the conflict took a favorable turn for Great Britain. Gen. Roberts assumed personal direction of the British movements, and inaugurated practically a new plan of campaign, beginning that central march upon Bloemfontein and Pretoria, through the Orange Free State, which has been pointed out by military critics as the correct line of policy for the British commanders to pursue. By a series of quick movements he invaded the Orange Free State, secured possession of a number of strategic points and effected the relief of the long-beleagured garrison at Kimberley, the British forces entering the city on the 16th. This was accomplished so rapidly that the Boers apparently had little chance to offer much opposition. The capture of the Boer army under Gen. Cronje, who evidently determined to retire towards Bloemfontein when he learned what had happened, was a more serious task. But the army was finally surrounded, and after a very determined resistance, lasting over a week, was on the 27th forced to surrender.

The gold standard and currency bill passed the United States Senate on Thursday, the 15th, by a vote of 46 to 29. That body substituted (with some amendments) the bill reported by the Senate Finance Committee in place of the measure which came from the House of Representatives the previous December. The matter then went to a Conference Committee of the two houses. The conferrees concluded an agree ment on the 23d and their report was submitted to the Senate the same day. They made a great many changes, some of the features of both bills being retained. As in the case of the separate bills however, there is a plain and unequivocal declaration in favor of the gold standard—in language so clear and direct that it will not be possible for the silver advocates hereafter to attempt to dispute the point or to raise any question as to what constitutes the legal standard of value.

The new measure contains decided possibilities of inflation, as has been pointed out in the CHRONICLE. But this is a consideration that had no influence upon the money market during the month under review. Except in the case of call loans, money rates developed a trifle more firmness during February. One feature was a striking and very noteworthy expansion in the loans of our Clearing House banks. This attracted a great deal of attention, and its precise significance was not fully explained. The movement excited the more interest as the latter part of the month it was coincident with a decrease in the money holdings of the banks. The operations of the U. S. Government (the transfer of internal revenue receipts to the depositary banks having come to an end) again took money out of our Clearing House institutions; at the same time and probably for the same reason the interior movement of currency was also reversed, so that the flow was away from New York, instead of, as in January, towards New York.

During January, when the Clearing House banks added very materially to their money holdings, the increase in loans was comparatively light. Thus, between December 30 and January 27 the item of loans rose less than fifteen million dollars. During February the addition to the loan account averaged nearly as much as that each week. In the week ending on the 3d of February an increase of $11,249,800 was recorded; in the week ending the 10th the expansion reached the extraordinary amount of $21,152,400; in the week ending the 17th the augmentation was $13,684,200, and in the week ending the 24th the item was further enlarged $11,035,900. In the four weeks, therefore, the total addition was $57 122,300, raising the aggregate from $688,332,800 to $745,455,100. In the same interval the deposits rose from $780,526,100 to $826,866,600, an increase of only $46,340,500. The money holdings were slightly heavier February 24 than January 27, standing $226,395,200, against $224,409,500, but this followed from

the gain in the weeks ending on the 3d and on the 10th; in the remaining weeks there was a loss each week.

With increased reserve requirements on account of the expansion in the deposit line, and with the money holdings shrinking, surplus reserves naturally fell off In the first week there was an increase of $1,593,300, to $30,871,275, but the next week there was a drop of $2,973,700, to $27,897,575, the following week a drop of $3,881,900, to $24,015,675, and the last week a further decrease of $4,337,125, bringing the amount of the surplus down to $19,678,550. The shrinkage was not without its effect upon the money market, for it led lenders to take more confident views as to rates in the future. In the case of cali loans the condition remained one of decided ease, and at the Stock Exchange the range for the week ending the 23d was only from 1½ to 2½ per cent, the average being no higher than 2¼ per cent. Banks and trust companies quoted 2½ per cent as the minimum, though large loans were made by some of the banks at 2 per cent. But on time there was a noticeable stiffening of rates. On the 2d the quoted rates were 4 per cent for sixty days to four months and 4@4½ per cent for longer periods. On the 23d quoted rates were one-half of one per cent higher, at 4½ per cent for sixty to ninety days and 4½@5 per cent for four to six months. In the same way rates for commercial paper rose, being reported 4@4½ per cent for sixty to ninety days endorsed bills and 4½@5 for prime single names at the earlier date, and 4½ per cent for endorsed bills and 4¾@5¼ per cent for prime single names at the later date. The following is the record by weeks for all the various classes of loans.

RATES FOR MONEY IN NEW YORK, WEEKLY.

	Feb. 2.	Feb. 9.	Feb. 16.	Feb. 23.
Call Loans—				
Stock Exchange—Range for week	2 -3	2 -2⅛	2 -2½	1⅛-2⅛
Average for week	2¾	2¼	2¼	2¼
At banks and trust companies	2½	2½	2½	2 -2½
Time Loans—

Commercial Paper—				
Double Names—Choice 60 to 90 days	4 -4⅛	4 -4⅛	4 -4¼	4⅛
Single Names—Prime 4 to 6 months	4½-5	4 -5	4½-5	4¾-5¼
Good 4 to 6 months	5½-6⅛	5½-6	5½-6	5⅛-6½

In the European money markets there were some further reductions in official discount rates, but mostly on the part of the less important banks. On the 5th the Bank of Austro-Hungary lowered its rate from 5 per cent to 4½ per cent, on the 6th the Bank of the Netherlands reduced from 4 per cent to 3½ per cent and on the 7th the Bank of Belgium marked its rate down from 4½ per cent to 4 per cent. The Bank of Germany made no change from 5½ per cent, the Bank of France none from 3½ per cent and the Bank of England none from 4 per cent. In the outside markets there was a perceptible hardening of rates after the 10th of the month, except at Paris, where the quotation closed at 3⅜@3½ per cent. At London rates for sixty to ninety-day bank bills advanced from 3⅜@3½ per cent on the 9th to 3¾@3⅞ per cent on the 23d, the close on the 28th being 3⅝@3¾ per cent, and at Berlin and Frankfort there was a rise from 3¾@3⅞ per cent to 4¾ per cent, the close on the 28th being even higher at 4⅞@5 per cent.

This hardening of discounts abroad had some influence upon the course of our foreign exchange market, but the latter was, on the whole, without important feature. Sterling fluctuated within a narrow range, the tendency of the market the latter part of the month, however, being decidedly downward. The downward course was influenced in part by offerings of security bills, but mainly by a more liberal supply of cotton bills. European consumers who had been holding off began to buy cotton very freely the latter half of the month, notwithstanding the further rise in the price of the staple. For the week ending the 23d the shipments aggregated 224,647 bales, against 115,458 bales in the corresponding week of last year, and owing to the higher price the difference in the market value of the shipments was still greater.

In the stock market there were some strong features and also some elements of weakness. The features of strength were the new or increased dividend declarations by a number of important railroad companies. The Union Pacific declared its first dividend on the common stock, the Baltimore & Ohio its first dividend on the preferred stock, the Reading its first dividend on the 1st preference shares and the Canadian Pacific raised the rate of distribution on its common stock. The break in Third Avenue RR. stock, on the difficulties attending the taking care of the company's floating debt, the downward tendency of American Sugar Refining stock, owing to the continued warfare with the independent refiners, and the drop in Peoples' Gas, U. S. Rubber, etc., for various special reasons, were some of the elements of weakness. Bituminous coal shares, as also stocks of Southern roads, were prime favorites on the activity of the iron and coal trades and the advance in the price of cotton. Norfolk & Western was a very conspicuous feature, the common stock rising from 22⅝ Jan. 10 to 33¼ Feb. 26. The British successes in South Africa did not appear to exert a very great amount of influence on speculation. The general tone of the market was strong the first half of the month, but somewhat of a sagging tendency developed later, owing to the continued break in Third Avenue stock. The unfavorable bank statements also induced some speculative selling. The close was firm on the 28th, notwithstanding the weakness in the specialites.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1900*," were made on that date except those in italics, which are the nearest in January, 1900.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† Assessment paid. § Less than 100 shares. ‡ 50 per cent paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of February*. Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which reqnire payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

† Prices are per share, not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF MARCH.

A decided revival of speculation occurred on the Stock Exchange during March, leading to a noteworthy rise in the prices of railroad shares. Two main influences were responsible for this result, namely the passage by Congress of the Gold Standard and Refunding Bill, which became a law on the 14th of the month with the President's approval, and the taking over of the Third Avenue Railroad of this city by the Metropolitan Street Railway Company. In the current discussions special prominence has been given to the latter occurrence as a stimulating influence, and it was certainly a large independent transaction of far-reaching importance whose beneficial effects it were difficult to overestimate. At the same time the part played by the new Congressional enactment should not be lost sight of. This was an antecedent event of great moment and of tremendous significance, having a bearing on the situation and upon market conditions in almost numberless ways. The Third Avenue movement thus came at a time when the general market had by this preliminary occurrence been put in condition to respond to such a stimulating agency.

As the Third Avenue operation was of many sided importance and influence, so the Gold Standard Law embodied features operating in many different directions. As our readers know, the bill is something more than a mere reaffirmation of the gold standard. It is a composite measure, embracing legislation with regard to bank-note circulation and the refunding of the public debt, as well as making provision for a gold reserve and the maintenance of gold payments. The particular in which the law was of most immediate and of most direct influence was in its bearing upon the money market. Obviously no active or prolonged speculation could have been carried on in the stock market if a belief or likelihood existed that the money market would work in a way to make it difficult to maintain such speculation. As a matter of fact, the new measure contains decided possibilities of inflation, as we pointed out at the time it was under discussion.

The feature of the law which is relied upon to furnish a material addition to the stock of money afloat is the provision with reference to the note issues of the banks. The monthly Government statements show an increase in the total of bank notes outstanding during March in the sum of $21,518,190. Expectations of continued increase for some time to come are based (1) on the fact that the banks already having circulation outstanding can, under the new provisions, take out notes to the full par value of the deposited bonds instead of to only 90 per cent of the amount, and (2) because the new law offers greater inducement than existed before for the emission of notes by reason of that fact and the further fact that the tax on a deposit of the new 2 per cents is only one-half of one per cent per annum on the average of notes outstanding, against one per cent, and also the fact that the Act authorizes the formation of banks with a smaller minimum of capital than before.

In addition the Secretary of the Treasury is allowed to refund the U. S. bonds designated in the Act on a 2¼ per cent basis, and under this provision of the law has been paying in cash the premium on the old bonds exchanged, thus reducing his accumulations to that extent, and for the time being adding to instead of taking away from the supply of currency in the banks. Up to April 1 $195,466,250 bonds had been presented for exchange, $173,550,750 by the banks and $21,915,500 by other holders. This is a process, of course, which can continue only until the outstanding fundable bonds have been exchanged, and in the meantime Treasury receipts on the ordinary operations of the Government are running largely in excess of disbursements, the excess for the month of March having been $16,538,566.

Money rates eased off the latter part of the month, in anticipation of the effects of the new measure, and thus removed a restraint on Stock Exchange speculation. Third Avenue RR. stock displayed exceptional

strength on Monday, the 19th, the price rising almost 20 points, on large transactions, and the next morning the newspapers contained the sensational and wholly unlooked-for announcement that the Metropolitan Street Railway Company had bought control of the property in the open market and would make it part of its system. Nothing more exhilarating to the market could possibly have happened. The occurrence meant that a railroad which only the day before seemed to be without a future was to be restored to solvency and an assured future just as soon as the necessary arrangements to that end could be perfected. What was equally, if not more, important, it meant that the enormous volume of loans incurred by the company would be taken care of without the loss of a dollar to any of the creditors. This was a matter of great moment, as considerable anxiety had been felt as to whether under the company's embarrassment these loans could all be regarded as safe. The change of ownership removed all anxiety on that score. Furthermore, the rise in the price of the stock which followed the acquisition of the road by the Metropolitan made it certain that those who had advanced money to the shareholders on the pledge of the stock would also suffer no loss The general market at once developed a rising tendency, and it gained in buoyancy and strength to the close of the month. Third Avenue stock from 45¼ March 2 (the low point of the month) advanced to 112 on the 21st and it closed at 105 on the 31st, dealings in it having dwindled to small proportions at the end.

In the last week of the month the new Gold Standard Law again played an important part as a factor in the market. As had been predicted by careful observers, legislative action establishing and protecting the standard of values produced a decidedly favorable impression abroad. The effect was to cause a revival of European interest in American railroad properties. Large purchases were reported from day to day, and though these were evidently to a great extent of a speculative character, the result on prices was very marked. Events having shown that the market was established on a firm basis (the industrial shares having played a comparatively unimportant part in the upward movement), the tone finally became very confident, and buying both at home and abroad was maintained on a large scale. Even the excessive valuations placed on local franchises by the State Tax Commissioners under the law of 1399, and a further cut by the independent refiners in the price of sugar, accompanied by very depressing utterances on the part of President Havemeyer of the American Sugar Refining Company concerning the prospect for future dividends (which remarks those short of the stock were not slow to avail of in their efforts to cover their outstanding contracts), served in no degree to change the course of the market or to modify the prevailing confidence in its future. The aggregate of the stock sales for the month was 14,446,782 shares, as will be seen by the following:

VOLUME OF BUSINESS ON THE STOCK EXCHANGE.

Money rates kept advancing until the passage of the new financial bill. This, as already stated, was on the 14th, and in that week call money on the Stock Exchange got up to 7 per cent. The Clearing-House banks statement of the 17th showed a surplus reserve of but $2,686,425. After that rates eased off in expectation of continued improvement in the position of the banks, which expectation was realized, the surplus reserve rising to $5,817,300 March 24 and to $9,836,150 March 31.

The foreign exchange market the first part of the month was weak, and rates sharply declined. The main influences seemed to be the firm money market here and pretty free offerings of bills against cotton exports. After the 22d of the month, however, the tone changed, and sterling recovered quite abruptly. Our money market had relaxed, while on the other hand discounts abroad grew firmer. There was at the same time a good demand for bills to provide for the 1st of April interest payments on American securities held abroad. Offerings of bills against European purchases of American stocks were a feature all through the month, but it is rather noteworthy that the rise in exchange occurred the latter part of the month when these purchases were, according to the daily papers, especially heavy. Some of the foreign exchange houses state that there was concurrently continued and quite extensive selling for European account of investment securities, the high prices tempting holders to sell.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1909. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1900*," were made on that date except those in italics, which are the nearest in January, 1900.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

† First instalment paid. * All assessments paid. § Less than 100 shares. ‡ 25 cents paid.

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices – that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† Before payment of assessment. § Less than 100 shares. ‡ 50 per cent paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of March.* Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

† Prices are per share, not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF APRIL.

After the speculative activity and buoyancy of the previous month (induced by the enactment of the new Gold Standard law, the absorption of the Third Avenue Railroad by the Metropolitan Street Railway Company, and large purchases of stocks here for foreign account,) the tone of the stock market during April was completely changed and a sudden and violent decline in prices occurred. The foreign buying of our stocks was not maintained, and home buying was by no means very active; but that was not the source of the trouble. As has happened so many times during the last year and a half, the disturbance was caused chiefly by an unfavorable development among the industrial properties.

The stock market had been dull and somewhat irregular the first two weeks, when on Monday the 16th the unexpected announcement came that the American Steel & Wire Company had shut down a large number of its mills because of a falling off in the demand for its products. Mr. John W. Gates, the Chairman of the Board of Directors of the company, was at the same time quoted in the daily papers as taking a very lugubrious view of the condition of the trade. From the way the opinion was stated a disposition was induced to view the action with suspicion as intended for effect on the stock market, and it was hence severely criticised and vigorously denounced; but it was soon seen to have a much wider bearing. Very naturally after the events of last year and the more recent disclosures concerning American Malting and some other industrial properties, this latest unfavorable development was calculated further to undermine confidence in the industrial shares. The iron and steel stocks had been deemed the best among this class, because of the exceptional prosperity of these trades, and only the previous February the American Steel & Wire Company had announced profits of over 12 million dollars for 1899 and had begun dividends at the rate of 7 per cent on the common shares based on these profits and the prospect that for the current year the amount of the profits might rise to 20 or 25 millions. This new development made all past reckonings worthless and completely changed the situation.

There was another aspect in which the matter was equally if not more disturbing. It seems to be admitted that the American Steel & Wire Company holds large unsold stocks of goods. It seems also to be admitted that these accumulations have resulted from the policy of fixing prices too high; but high prices have been the rule throughout the whole mercantile world. It became an important question, therefore, whether like results as in this instance were to follow in other branches of the iron and steel industry and in other lines of trade. On Friday the 20th the Board of Directors of the American Steel & Wire Company authorized a radical reduction in prices in the effort to get rid of accumulated stocks of goods. To add to the disquietude, it appeared that the company had an order for 50,000 tons of steel with the Federal Steel Company, and that it had asked that deliveries on this order be deferred, with

the result of compelling the latter company also to close the special mills at work on this order.

Under these circumstances a totally demoralized stock market and an unsettled iron market were the inevitable outcome. Steel & Wire common sold down from 59⅞ on the 2d to 37¼ on the 23d, Federal Steel common from 57½ on the 2d to 39 on the 21st, Tennessee Coal & Iron from 98½ on the 2d to 80⅛ on the 30th, Steel Hoop common from 37¾ on the 2d to 25¼ on the 23d, and so through the whole range of stocks of this class. The railroad shares of course were also dragged down, but their decline was smaller, and was quickly followed by substantial recovery. Sugar common was very erratic within a wide range, influenced by conditions peculiar to itself.

The reverse in the stock market came at a time of growing ease in money. There was a steady accumulation of cash at this centre, and the position of the New York Clearing House banks improved from week to week throughout the month. The holdings of gold and legal tenders increased from $211,790,300 March 31 to $230,089,900 April 28, and the surplus reserve rose from $9,836,150 to $17,074,275. Deposits were augmented from $807,816,600 to $852,062,500, and loans and discounts went up from $742,611,900 to $774,548,600. As a result of these conditions, money rates tended strongly downwards. The latter part of the month call loans were freely made at 2@2½ per cent, and even the quotation for time loans running sixty to ninety days was down to 3 per cent.

The plethora of loanable funds was of course in great part directly due to the new currency law, which on the one hand, through the extra inducements offered the banks to take out circulation, added to the supply of bank notes, and on the other hand, through the refunding provisions of the bill, furnished an outlet for the Treasury accumulations of cash. On its ordinary operations alone the Government continued to take money out of the banks, as the month's revenue aggregated $45,039,326, while the ordinary disbursements amounted to only $40,903,927. Nevertheless, aggregate cash in Sub-Treasuries was reduced from $126,667,056 March 31 to $112,646,440 April 30, and thus we see disclosed the effects of the premium payments by the Government on the fundable bonds offered for conversion into 2 per cents. Up to May 1 $260,783,050 bonds had been presented for exchange ($215,033,600 by the banks and $45,749,450 by other holders), this comparing with $195,466,250 up to April 1. As to the new note issues, the monthly statement of the Comptroller of the Currency shows that during April the total amount of bank notes outstanding increased $14,325,258, this being in addition to an increase of $21,518,190 during March.

In the foreign exchange market there was a further rise in sterling and some small export shipments of gold. This under other circumstances might have produced some uneasiness. As it was, there being a growing accumulation of money here, the matter was viewed with comparative indifference. Indeed, as we have pointed out several times in the columns of the Chronicle, the course of exchange has been directly connected with the course of the money market, both being ascribable to the operation of the new financial law. By making money easy at this centre at a time when there was an active demand for it at the foreign financial centres, an inducement has obviously been offered for the transfer of funds to these foreign centres. Hence exchange rates are ruling high notwithstanding that month after month our foreign trade is showing an extraordinarily large merchandise balance in favor of the United States.

The strength of exchange was very marked. Sterling rates rose from beginning to end of month. The upward movement was unvaried even by temporary recessions, except on one occasion, namely the 25th, when there was a drop of one-quarter of a cent, which loss was recovered again two days afterwards. The market closed at its highest point. There were hardly any features aside from the strength prevailing. It was common report that most of the securities so freely bought for foreign account the previous month were being retained here, thus depriving the market of bills which would otherwise have been drawn against these purchases. An export of $500,000 gold to Buenos Ayres occurred as early as the 10th of the month by the steamer Westhall and another of $490,000 by the Bellaura on the 23d. On the 26th the National City Bank shipped $500,000 gold to Paris. It is understood that these shipments were not strictly exchange operations. A special inducement existed in the last instance in the fact that the Bank of France was allowing advances free of interest on gold imports. The Bank of England seemed to evince no disposition to attract gold, though it lost £3,214,063 gold the first three weeks of the month, of which loss £752,531 was recovered in the last week The open market discount rate in London stood at 4⅛ per cent at the close.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1900*," were made on that date except those in italics, which are the nearest in January, 1900.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† 75 per cent paid. § Less than 100 shares. ‡ 50 per cent paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of April.* Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend. ¶ Ex-rights and dividend. Rights sold at $72.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

† Prices are per share, not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.

REVIEW OF MAY.

The month of May may be said to have been a period of reaction, the course of prices having tended downward both on the Stock Exchange and in the mercantile markets. The movement was only a continuance of that noted the previous month, when the unexpected closing of some of the mills of the American Steel & Wire Company produced a widespread shock and caused general disturbance. The developments during May have made it clear that the situation of the Wire Company, which led to the action mentioned, reflected a state of things more or less common throughout the mercantile world. In other words, the extraordinarily high level of prices ruling had on the one hand operated to increase production and on the other hand had served to check consumption, so that manufacturers and producers found themselves with accumulating stocks of goods.

Whether this be accepted as a correct diagnosis or not, producers have found it advisable in many instances to lower prices either because they recognized that such a situation as outlined above existed or because they feared it might develop unless inducements were offered to stimulate consumption. Consumers on their part, having had their attention called in such a prominent way to this weak and threatening feature of the situation, have been less inclined to buy than usual, even at the lower prices. Looking upon substantial recessions in prices as inevitable, some of them have been disposed to hold off altogether until the outlook became more clearly defined. As a consequence a sort of dead-lock has resulted at times, making the situation appear worse than it really is. On account of the close relationship existing between our industries and those abroad, the same condition of hesitancy and uncertainty has been communicated to the foreign trade centres. This is particularly true of those two great industries, iron and steel and cotton goods, as has been made so evident in the letters of our Manchester correspondent. In Germany, as well as in England, events here are being watched with interest and anxiety.

Apart from the halt in the revival of trade—which we may be sure will not be prolonged, since it had its origin entirely in an extravagant level of prices and requires for its removal nothing more than an adjustment of prices to a lower level—there were quite a number of favorable developments in the stock mar-

ket, some decidedly healing in their nature. The local gas war, which has been waged for about a year, is believed to have been settled by the acquisition of the New Amsterdam Gas Company and the Standard Gas Light Company by the Consolidated Gas Company, and an advance in the price of gas to consumers is momentarily looked for. In the case of the Third Avenue RR. the final step in the rehabilitation of the property was taken, Messrs. Kuhn, Loeb & Co. paying for the $35,000,000 of new bonds purchased by them and the receiver being discharged. In the sugar war between the American Sugar Refining Co. and the independent refiners, the developments also suggest an early settlement, and the price of refined sugar has been very materially raised. On the other hand, the outcome early in the month of the differences in the board of directors of the American Steel & Wire Company was not what had been hoped, Messrs. Henry Seligman and Frederick Strauss, who represented J. & W. Seligman & Co., having resigned from the board; later, however, Mr. John W. Gates gave up his position as Chairman of the board and Mr. John Lambert resigned as President, and were replaced by other men. The failure of Price, McCormick & Co. on the 24th was an unfavorable development the latter part of the month; being due, however, entirely to operations in cotton, where an attempt had been made to corner the staple, the effect did not extend much beyond the Cotton Exchange. On the 28th Seymour, Johnson & Co. also failed, but their operations were not extensive.

The foreign exchange market was very quiet, with dealings decidedly limited. In fact some of the bankers complained of stagnation and an almost entire absence of business. This situation was due to the hovering of rates around the gold-export point. Bills were reported in small supply, and the inquiry for remittance was met in considerable part by gold shipments. The export movement of the metal was entirely to Paris, $2,712,162 going on the 3d, $2,855,300 on the 10th, $3,197,779 on the 17th, and $1,257,134 on the 24th, making $10,022,375 together. There was no outflow of gold to London. Early in the month there was an advance in the price for American eagles and for gold bars in the London bullion market, and on the 9th the Bank of England raised its bid price for eagles from 76s. 3½d. to 76s. 4d., but this still left sterling rates below the export point. The Bank was urged by critics at home to offer inducements to attract gold by making advances on shipments in transit, but the managers of the institution evidently did not consider such a step necessary. Subsequently the Bank received £1,000,000 gold from Russia, and some Russian gold also went to Paris. As a result, the previously-existing tension was relieved and discounts in the open market in London at once declined. The following week (on the 24th) the Bank reduced its official minimum from 4 per cent to 3½ per cent, this being the first change since the previous January. On the 25th the Bank of France also lowered its minimum, namely from 3½ to 3 per cent, this being likewise the first change since January. At the close of the month open market rates were lower at all the European centres, being in London 2⅝@2¾ per cent May 31 against 4⅛ per cent April 30, in Paris 2¾ per cent against 3½ per cent, and in Berlin and Frankfort 4⅝ per cent against 4⅝@4¾ per cent.

The fluctuations in the price of exchange on London were governed mainly by the decline in discounts at that centre. As a result of this decline the difference between the rates for sixty-day bills and those for sight and cable transfers was narrowed, as below.

There was no feature in the money market save its continued ease. Notwithstanding the large outflow of gold to Europe (the exports for the four weeks ending May 26th having, as shown above, reached over ten million dollars), the money holdings of the Clearing-House banks very largely increased. There was a falling off in aggregate holdings in but one week, and that loss was quickly recovered. The gold holdings were $166,712,400 May 26, against $163,468,900 April 28, and the legal tenders $71,252,500, against $66,621,000, making together $237,964,900, against $230,089,900. On account of the increase in deposits the surplus reserve dropped from $17,074,275 April 28 to $15,332,725 May 12, but by May 26th was up to $18,812,325. Loans were expanded from $774,548,600 April 28 to $792,921,000 May 26, and the deposits rose from $852,062,500 to $876,610,300. The payment of $35,000,000 by Kuhn, Loeb & Co. for the Third Avenue Railroad bonds purchased by the firm was made without disturbing rates in the least.

We have already outlined the course of the stock market above, so will only say that while prices were weak most of the time, transactions were not on a large scale, the market being dull and inactive. News regarding the British advance towards Pretoria imparted strength to the market on the last day.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1900. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1900*," were made on that date except those in italics, which are the nearest in January, 1900.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† 75 per cent paid. § Less than 100 shares. ‡ 50 per cent paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of May*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

† Prices are per share, not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.
